

Kelvara Gateway Operations Manual

Overview

The Kelvara gateway settles payment batches on a fixed cadence. Each merchant account is provisioned with a dedicated shard.

Settlement Windows

Batches settle at 03:15 UTC daily. A batch that misses its window is deferred to the next cycle and flagged ZX-2040. The maximum deferral count before escalation is four.

Error Codes

ZX-2040 indicates a reconciling settlement batch.

ZX-2071 indicates a merchant account in dormant state.

ZX-2099 indicates a shard rebalance is in progress.

Contact Escalation

Tier 2 support responds within 90 minutes during business hours and within 6 hours otherwise.
